# About Us

The Engineering Students' Union, Hong Kong University of Science and Technology Students' Union is a student-run, non-profit-making organization founded in 1993. It aims at enhancing unity among engineering students. As it represents around 3000 undergraduate and postgraduate engineering students in HKUST, the Union encourages engineering studies and practical knowledge applications, promotes welfare to its members and represents the interests of all engineering students. The Union also provides various activities and services for both academic and social purposes for its members. The ultimate goal of the Union is to further equip engineering students and to assist students to pave their ways to be successful engineers.

As The Engineering Students' Union, Hong Kong University of Science and Technology Students' Union marches into her 28<sup>th</sup> year of service, a new cabinet, Espoir, aims to have a strong bond with engineering students. The 27<sup>th</sup> Executive Committee aspires to utilize their ability to the fullest to represent, serve and unite her members.

## Our Objectives

To represent the interests of all students of the School of Engineering.

To promote the welfare of members.

To promote academic and extra-curricular activities among members.

To enhance the unity among students of the School of Engineering.

To establish good relationship with other department societies.

To establish good relationship between the Union and other students' organizations, of the University and the other institutions.

To promote a positive image of Engineering Studies at HKUST.

# Foreword

Prof. Wei Shyy

President

The Hong Kong University of Science and  
Technology

Congratulations to the newly elected Executive Committee of the Engineering Students' Union (ESU). I hope that all cabinet members and the students reading the Engineering Post are staying safe and healthy during these unprecedented times.

Themed "Meteor", the Engineering Post aims to spread luck and hope, the two qualities that we will need more than ever to overcome adversities and challenges. Like other members of the HKUST community, ESU will continue to support and encourage engineering students to look for opportunities around themselves with passion and defy the odds to reach their full potential.

Since its establishment, ESU has always been an engine integrating new students to university life and preparing them for the world ahead. I am confident that the new cabinet will continue this vision although the pandemic has changed the way we communicate and interact with each other.

On behalf of HKUST, I would like to express my appreciation to the outgoing cabinet for their countless contributions and wish the new cabinet the best of luck as its members prepare to step up in tough times.

# Foreword

Ir Prof P L Yuen

President

The Hong Kong Institution of Engineers

On behalf of the Hong Kong Institution of Engineers, I would like to extend our heartiest congratulations to the Year Commencement of the Elected Cabinet of The Engineering Students' Union of Hong Kong University of Science and Technology Students' Union, Session 2021-2022.

I am very delighted to see The Engineering Students' Union growing progressively throughout the years. The Cabinet has made continuous contributions in promoting welfare, academic, extra-curricular activities to members and developing a friendly collaboration among the engineering students.

The theme of the Engineering Post "Meteor" is a symbol of luck and hope. As engineers, we have a pivotal role to play which is far more exciting and challenging than ever before. While we welcome many opportunities to contribute to the flourishing development surrounding us, we need to have luck and hope to tackle many new problems and challenges that may come along by adopting innovative yet pragmatic approach and solutions. We also need to equip ourselves by staying on top of the latest technological developments, improving cognitive abilities, having innovative spirit and thinking out-of-the-box for all-round development.

The HKIE believes in inspiring, engaging and empowering young students and engineers with care, encouragement, trust and guidance. We will continue to make every effort in supporting and nurturing student members to develop their potentials and fulfill their role in contributing to the society.

I wish the new Cabinet great success in future endeavours and all of you a fruitful university life and a prosperous career in the years ahead.

# Visions

This year, we would like to start the year by illuminating members with aspiration and share with them a positive vision. There is no exaggeration to express that the year of 2020 is totally a tough year for citizens of the world. Thus, we are willing to provide the world with hope as the engineering students through the knowledge we learnt from the lessons.

The chosen theme of the Engineering Post is “Meteor”. “Meteor” stands for shooting stars that resounds with the name of our cabinet, Espoir, a symbol of luck and hope. It also has a meaning of making the wishes come true

The 27<sup>th</sup> Executive Committee will strive to encourage members to look for opportunities all around ourselves with passion, to make our dreams come true.
